REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art does not teach or fairly suggest the apparatus as recited in independent claims 10 and 16 of the instant invention comprising, *inter alia* a medical device comprising a flexible member and an end effector associated with a distal end of the flexible member, wherein a lever actuator is disposed on the handle and the flexible member extends from an end of the elongate handle along an axis parallel to a longitudinal axis of the elongate handle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Doshi et al. disclose a system for operating a flexible endoscopic device with one hand comprising: an end effector 10a-b, 11a-b, 12a-b having a first and second configuration (See Figs. 8a-c), a handle 5, a flexible shaft 15 extending intermediate the end effector and the handle; the handle comprising: a housing, the housing being longer than the housing is wide, and sized and shaped to be grasped by a single hand; an actuator 7a-b comprising a lever extending lengthwise alongside the housing (see Figs. 6-7) and operable by the hand holding the housing to actuate the end effector from a first configuration to a second configuration (See Col. 7, Lines 8-36) and a release 4 (see Col. 7, Lines 38-49). However, Doshi et al. is silent with respect to wherein the flexible shaft extends from the housing along an axis generally aligned with the length of

the housing. Furthermore, one of ordinary skill in the art would not have been motivated to modify the handle of Doshi et al. with the prior art of record, as realigning the flexible shaft of Doshi et al. to extend in the direction as claimed (axially aligned with the length of the handle), would teach against the functionality of the handle as taught by Doshi et al.
